*Achievements/Tasks*

- **Thali Ordering App** - The user can customize the content of Thali. We can add or remove following items and change the quality of these items: - Chapati- Pickle- Curd- Sweet- Daal- Paneer Dish.[Link-](#)
- **Create a To-do list** - Where you can keep you daily tasks and mark them as complete. the to-do list should have following features: Delete, mark and submit.[Link-](#)
- **Sorting Visualizer** - Helps us to sort the array from ascending to descending and with these assignment we can see the working of different sorting visualizers.[Link-](#)
- **Tip Calculator Using React** - As a restaurant owner, I want to calculate the total tip offered by various customer according to their experience. For example, if the experience is excellent and the total bill of the customer is 2000 The total tip would be 20% of 2000 i.e. 400 Rs. You need to show Customer Name and the tip amount 400 as an output for each customer. Refer to the attached image for the functionality UI.[Link-](#)
- **Tip Calculator Using Javascript** - Same tip calculator using javascript and html and css.[Link-](#)
